Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 18 November 2003.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claims 1-4, 6, and 9 are rejected under 35 U.S.C. 102(b) as being anticipated by Leica (DE19836812) (using the applicants disclosure, US6624881, US6587184, and US6903810 for translation).

Referring to **claim 1**, Leica shows an extreme value measuring process of a handheld laser distance measuring device wherein there is an input means (applicants disclosure), individual measurements (US6903810 disclosure), at least one maximum and minimum value (applicants disclosure), and an extreme value difference calculated (applicants disclosure)

Referring to **claim 2**, Leica shows that after computation by the handheld laser distance device the measurement sequence is expanded and continued with the second step (US6587184).

Referring to **claim 3**, Leica shows in the second step during the execution of the measurement sequence individual measurements of the distances to a plurality of different measurement points along a measurement path are made triggered by the handheld laser distance measuring device (applicants disclosure and US6624881).

Referring to **claim 4**, Leica shows the measurement path that covers at least in part a surface and an object arranged in front of the surface (figure 2).

Referring to **claim 6**, Leica shows the extreme value difference is used as a parameter of a further basic measuring task (applicants disclosure).

Referring to **claim 9**, Leica shows an input means for activating an extreme value measurement process for joint determination of both a minimum value and maximum value of the distance of a measurement sequence (applicants disclosure and US6624881).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 5, 10, and 11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Leica (DE19836812) (using the applicants disclosure, US6624881, US6587184, and US6903810 for translation).

Referring to **claims 5 and 10**, it would be obvious that with the computation of the difference (applicants disclosure) and the graphic display (shown by US6624881) that the difference of the maximums would be displayed on the graphic display.

Referring to **claim 11**, it would be obvious that with the computation of the maximum and the minimum value (applicants disclosure) and the graphic display

Art Unit: 3662

(shown by US6624881) that the maximum and minimum values would be shown on the graphic display.

Allowable Subject Matter

Claims 7 and 8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Luke D. Ratcliffe whose telephone number is 571-272-3110. The examiner can normally be reached on 8:00-4:30 M-F.
